NORTHEASTERN ILLINOIS
PLANNING COMMISSION

On September 19, 1974 the Northeastern Illinois Planning Commission endorsed year 2000 population forecasts for the counties and townships in northeastern Illinois. The population forecasts, plus related forecasts of total households and total employment, are presented in the tables that follow. These forecasts will be subject to annual update and review.

The Commission endorsed in August, 1973, an eight-county regional forecast. The county and township forecasts herein represent a distribution of the northeastern Illinois portion of this regional forecast. The distribution is based on:

- 1) regional planning goals derived from the Comprehensive General Plan;
- 2) a township forecasting model that related available land to location preferences;
- 3) a demographic technique considering fertility, migration and life expectancy at the county level;
- 4) local growth goals, attitudes and forecasts as expressed by municipal and county officials.

Now in preparation is a report that will fully summarize the background of developing year 2000 forecasts - the methodology, the goals and related policy assumptions, the regional forecasts, public participation and final county and township forecasts. This publication will replace the Commission's Planning Paper No. 10 - Population, Employment and Land Use Forecasts for Counties and Townships in Northeastern Illinois.
