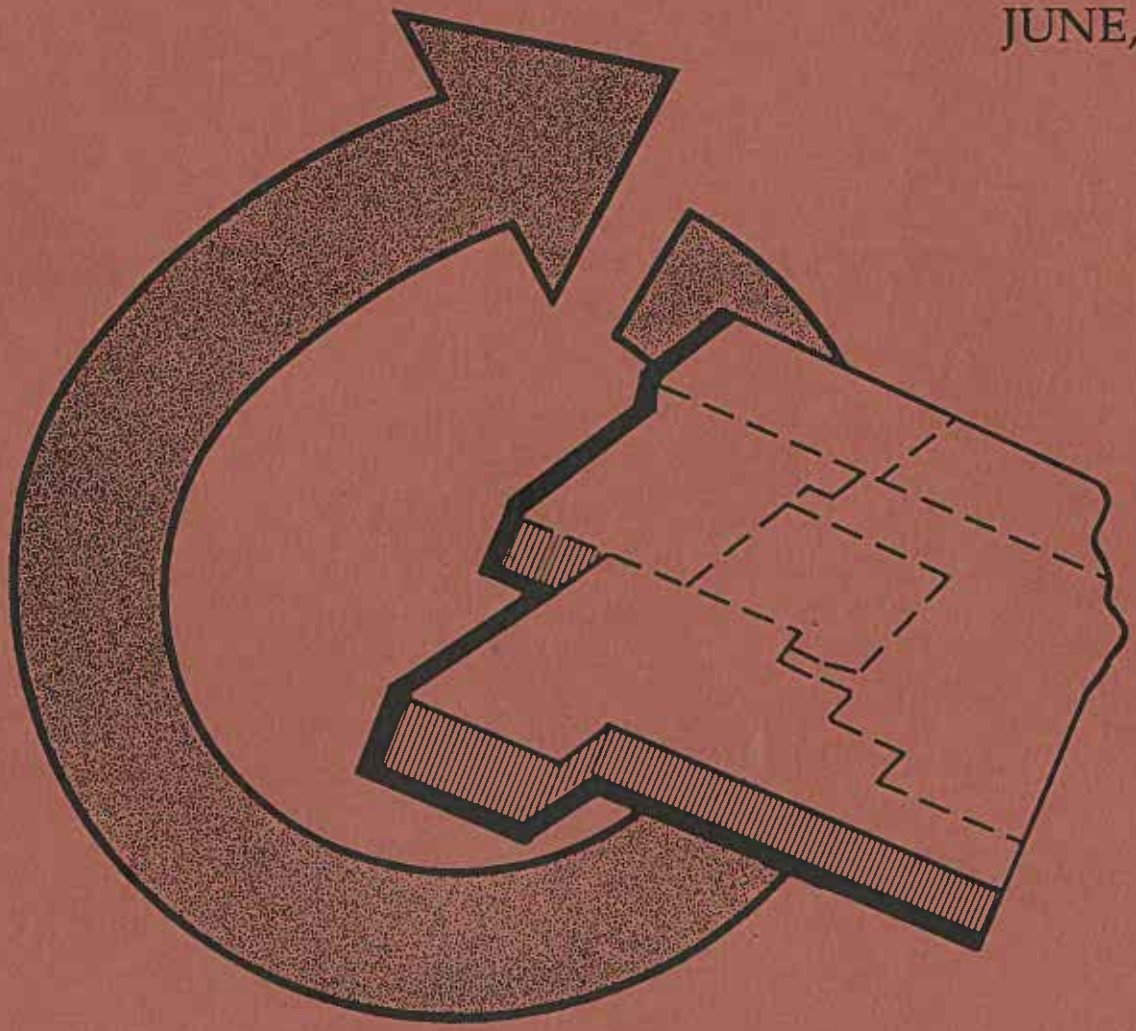
1990 AND 1980 CENSUS — SELECTED INCOME CHARACTERISTICS FROM SUMMARY TAPE FILE 3A

Northeastern Illinois Municipalities, Counties, Townships and Chicago Community Areas

JUNE, 1993



NORTHEASTERN ILLINOIS PLANNING COMMISSION

Northeastern Illinois is diverse in its land use and complex in its political structure. It has some of the most productive farms on earth — also one of the world's greatest cities. It contains 3,714 square miles of land and 38 square miles of water. It is home to 7 million people, organized in more than 1,250 units of government.

In 1957, following a decade of rapid urbanization in the Chicago suburban area, the Illinois General Assembly created the Northeastern Illinois Planning Commission (NIPC) to conduct comprehensive planning for the six-county greater Chicago region.

The Commission has three statutory charges: conduct research and collect data for planning; assist local government; and prepare comprehensive plans and policies to guide the development of the counties of Cook, DuPage, Kane, Lake, McHenry and Will.

By necessity, regional planning deals with general development policies not local land use detail. NIPC supports and coordinates county and municipal planning. The Commission has advisory powers only and relies upon voluntary compliance with its plans and policies.

COMMISSIONERS

Appointed by the Governor of Illinois

Alan D. Cornue,
Member, Plan Commission, City of Woodstock

Ruth K. Kretschmer,
Commissioner, Illinois Commerce Commission

Donna P. Schiller,
Executive Director, Citizens for Court Reform

Charlie A. Thurston,
Vice President, Northern Illinois Gas Company

Edgar Vanneman Jr.
Former Mayor, City of Evanston

Appointed by the Mayor of Chicago

Lemuel Austin Jr., *Alderman, 34th Ward, Chicago*

Ed H. Smith, *Alderman, 28th Ward, Chicago*

Mary Ann Smith, *Alderman, 48th Ward, Chicago*

Valerie B. Jarrett, *Commissioner, Department of Planning and Development*

Rosanna A. Marquez,
Assistant to the Mayor

Elected by the Assembly of Mayors

Thomas A. Brown, *President, Village of East Hazel Crest*

Betty M. Cheever, *Mayor, Village of Downers Grove*

Jo Ann Eckmann, *Mayor, Village of Libertyville*

William Ottilie, *Mayor, City of Geneva*

Sheila H. Schultz, *President, Village of Wheeling*

Marcy Stanger, *Trustee, Village of Fox River Grove*

Anthony Uremovic, *Councilman, City of Joliet*

Appointed by the County Board Chairmen

Jerry Butler, *Member, Cook County Board of Commissioners*

Danny K. Davis, *Member, Cook County Board of Commissioners*

Herbert T. Schumann, *Member, Cook County Board of Commissioners*

Olivia Gow, *Member, DuPage County Board*

Patricia Sjurseth, *Member, Kane County Board*

Richard Raftis, *Member, Lake County Board*

Donald Doherty, *Member, McHenry County Board*

Raymond Semplinski,
Will County Board

Appointed by the Board of the Regional Transportation Authority

Donald L. Totten

Appointed by the Board of the Chicago Transit Authority

Arthur F. Hill Jr.

Appointed by the Board of Metra

W. Warren Nugent

Appointed by the Board of Pace

Robert Parker Coffin

Appointed by the Board of the Metropolitan Water Reclamation District of Greater Chicago

Patricia Young

Appointed by the Board of the Illinois Association of Park Districts

Ralph Cianchetti, *Commissioner, Park District of Highland Park*

Appointed by the Board of the Chicago Park District

Margaret T. Burroughs

Appointed by the Board of the Illinois Association of Wastewater Agencies

James E. Swarthout, *President North Shore Sanitary District*

DATA BULLETIN 93-3
1990 AND 1980 CENSUS -- SELECTED INCOME CHARACTERISTICS FROM SUMMARY TAPE FILE 3-A FOR NORTHEASTERN ILLINOIS MUNICIPALITIES, COUNTIES, TOWNSHIPS AND CHICAGO COMMUNITY AREAS

INTRODUCTION

This data bulletin presents income data extracted from the 1990 Census Summary Tape File 3-A (STF 3-A). The data herein include median household income, median family income, per capita income and number of households per selected income range, as well as average household income by race and Hispanic origin. The geography covered is northeastern Illinois, including 6 counties, 115 townships, 263 municipalities, and 77 Chicago community areas. Meanwhile, two companion data bulletins, 93-4 and 93-5, will contain selected labor force and poverty characteristics from STF 3-A.

The purpose of this bulletin is to quickly disseminate 1990 Census STF 3-A income data to a broad audience in a relatively unencumbered manner. Therefore, it contains no analysis and no maps or graphs. Also, it excludes any data for census tracts and block groups. NIPC can, however, prepare comprehensive 29-page profile reports from STF 3-A for each county, township, municipality, census tract, ZIP Code, and Chicago community area in northeastern Illinois. These STF 3-A reports are available at cost: $25 for the first report, $15 for each additional one. NIPC subscribers, of course, receive a 20% discount. Users interested in the full range of demographic data available from STF 3-A should contact the Research Services Department at 312-454-0400.

The remainder of this text provides definitions and cautions concerning the data presented in the tables. Most of what follows is an edited version of Census Bureau documentation.

ACCURACY OF THE DATA

Sampling Error

Data contained in STF 3-A are estimates, based on questionnaires distributed to only a sample of the housing units in any specific area. These questionnaires contained 45 more questions than the basic "short form" 14 question survey distributed to all housing units.

The "long form" questionnaire, tabulated on STF 3-A, was mailed out, on average, to one of every six housing units. In governmental jurisdictions with an estimated population of fewer than 2,500 people in 1988, one out of every two housing units was sampled. Except in the most populated census tracts where the rate was one in eight, the sampling rate in other jurisdictions was one in six. *Data in this bulletin are the Census Bureau's estimates of the actual figures that would have resulted if the questionnaire had been distributed to all housing units.*

Because the data are based on a sample they are subject to sampling error (i.e., the difference between actual values and the values derived from a sample). Based on a one in six sample, the following guidelines could be used to assess the impact of sampling error:

There is about a 5 percent probability that an estimated value of 10,000 persons or households with a particular characteristic shown in a table in this data bulletin actually represents a value of less than 9,560 or more than 10,440. The interval becomes proportionately wider as the estimated value drops. The comparable confidence interval for an estimated value of 1,000 is 860 to 1,140. For a value of 100, the interval is 56 to 144.

For all practical purposes, an estimated value of less than 100 should be considered only a very approximate indication of the actual number. Zero does not indicate that there are no people with a particular characteristic, but merely that none showed up in the sample.

Confidentiality Edit

As in previous census counts, the Census Bureau is committed to preserving the confidentiality of individual responses. In the 1980 Census, certain data items were suppressed so that it would not be possible to identify specific individuals or households. For this Census there is no suppression in the sense that selected data cells are left blank. Of course, for sample data, the sample itself provides adequate protection against the disclosure of information about specific individuals, households, or housing units. For the smaller geographic areas for which the sample data are available, however, a confidentiality edit is applied. The edit is conducted by selecting a small subset of households from the sample files and blanking a subset of the data items on these records. Responses to these items are then imputed using the same procedures that are used for imputing inadequate responses or non-responses (see discussion of imputation below). Confidentiality is thus maintained because users can never be sure whether tabulated information is completely accurate. According to the Bureau, "the editing process is implemented in such a way that the quality and usefulness of the data were preserved."

Imputation Procedures

Often respondents may fail to answer all the questions on the Census questionnaire or may answer certain questions inconsistently. In such cases remaining after the Bureau's field operations have been completed, the Census Bureau edits the data by assuming that the proper responses would have been identical to those of a previously processed and statistically similar household or individual for whom more complete information is reported. In some cases, no responses were provided for an individual or housing unit. In these instances, an entire set of characteristics is "substituted" for the missing record by repeating an earlier, complete record. Many individuals who may now claim they were never counted, in fact, may have been counted in this manner.

IMPORTANT DEFINITIONS

Race

The concept of race as used by the Census Bureau reflects self-identification rather than any clear cut scientific definition of biological stock. The racial categories used in the 1990 Census were White; Black; American Indian, Eskimo, or Aleut; Asian or Pacific Islander; and Other Race. The Census Bureau classifies Hispanics as an ethnic rather than racial group; therefore, persons of Hispanic origin may be of any race.

Household

A household is synonymous with an occupied housing unit (i.e., the number of households equals the number of occupied housing units). A household may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share housing arrangements.

Householder

One person in each household is designated as the householder. In most cases, this is the person, or one of the persons, in whose name the housing unit is owned, being bought, or rented and who is listed in Column 1 of the census questionnaire.

Family

A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. If a family household also contains persons not related to the householder, these unrelated persons are household members but not family members. Families are classified by type as either a "married-couple" family or "other family" (e.g., female householder, no spouse present) according to the sex of the householder and the presence of relatives.

Income

Income is defined as money income and excludes money received from the sale of property, the value of "income" in-kind from food stamps, public housing subsidies, medical care, employer contributions for pensions, withdrawal of bank deposits, tax refunds, gifts, insurance payments and inheritances. Income, however, includes not only wage and salary income, but also nonfarm, self-employment income; farm self-employment income; interest, dividend or net rental income; social security income; public assistance income; and income from all other sources.

Household Income

This includes the income of the householder and all other persons 15 years old and over in the household, whether related to the householder or not. Because many households consist of only one person (and, hence, only one income), median household income is usually less than median family income.

Family Income

In compiling statistics on family income, the incomes of all family members 15 years old and over are summed and treated as a single amount. Although income statistics come from calendar year 1989, the composition of families refers to the time of the Census itself (April 1990). Thus, family income does not include income received by persons who were members of the family during any part of 1989 if these persons no longer resided with the family in April 1990. At the same time, income is included for family members who did not reside with the family during 1989 but were members of the family in April 1990. However, the composition of most families was the same in 1989 as in April 1990.

Median Income

The median divides the income distribution of households and families into two equal parts: those having incomes in a particular year above the median and those with incomes below the median. For households and families, the median income is based on the distribution of all units, including those with no income.

Average Income

This is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Hence, average household income is obtained by dividing total household income by the total number of households. Caution should be observed in using and analyzing average income values for small subgroups of the population. Because the average for a small universe is strongly affected by extreme values in the distribution, it is especially susceptible to the effects of sampling variability, misreporting, and processing errors. As a result, the median, which is not influenced by extreme values, is a better income measure than the average when dealing with a small population or household base.

Per Capita Income

This is the aggregate income for all persons in a particular group divided by the total population of that group.

Additional Definitions

The best source of additional information concerning census concepts, definitions, conventions and historical comparability is the Census Bureau's *Census of Population and Housing, 1990: Summary Tape File 3 Technical Documentation.* Call the Data User Services Division, Customer Services Division, Bureau of the Census, Washington, D.C. at 301-763-4100.

GEOGRAPHIC AREAS

Places are incorporated municipalities. Boundaries for many places have changed between 1980 and 1990 due to annexations, detachments, mergers, or disincorporations. No data is shown for the villages of Lily Lake, Virgil, and Volo because these places incorporated after the 1990 Census was taken. The municipalities of Diamond, Godley, Maple Park, Montgomery, and Minooka are partly inside and partly outside of northeastern Illinois; the data herein includes all parts of these communities.

Minor Civil Divisions are essentially equivalent, in northeastern Illinois, to townships. Some MCD's are co-extensive with municipalities of the same name, such as Evanston and Oak Park. However, others cover areas quite different from their namesake municipalities; for example, Niles Township includes only part of the village of Niles, but does include all or part of several other municipalities, as well as unincorporated areas.

Chicago Community Areas are areas within the city of Chicago which are commonly used for statistical purposes. They comprise groups of census tracts, consecutively-numbered in most cases. Because some census tract boundaries within Chicago have changed between 1980 and 1990, there may be some changes in community area boundaries.

TABLE 1

1990 CENSUS: MEDIAN HOUSEHOLD, MEDIAN FAMILY, AND PER CAPITA INCOME FOR NORTHEASTERN ILLINOIS COUNTIES, TOWNSHIPS, MUNICIPALITIES, AND CHICAGO COMMUNITY AREAS (WITH COMPARISONS TO 1980 CENSUS RESULTS)
